RESPONSE TO ANAPHYLACTIC REACTIONS

Trillium Lakelands DSB recognizes that anaphylaxis is a severe allergic reaction that can be fatal and that many of our students and staff suffer from extreme life-threatening allergies to certain foods, medications, insect stings, or non-food materials such as latex.

The Board, in partnership with student families and staff members, is committed to ensuring the safety of students and staff who suffer from extreme allergies by empowering school administrators to respond to their needs consistently through information and awareness, in-service, training, providing a safe environment, and the development of emergency medical plans for allergic occurrences.
