

SPECIAL EDUCATION PLAN

SECTION 17: Transportation

TRANSPORTATION

Trillium Lakelands District School Board recognizes that some students with special education needs require specialized transportation arrangements.

Students in special education programs receive transportation according to the board transportation policy and procedure. In this procedure there is provision for students requiring specialized transportation arrangements due to their special needs to the local school, or due to the fact that they are transported to a special education program in another school.

Approval for the specialized arrangements is required in writing from the Superintendent responsible for Specialized Services.

Further information about Transportation in TLDSB can be found at:
